**MISS**, *n.* [contracted from *mistress.*] *pl.* **MISSSES**. A young girl; a term of respectful address to an unmarried female, prefixed to the name; as, "The Miss Smith, Miss Olivia: — an unmarried female kept in concubinage; a kept-mistress. ["Miss, at the beginning of the last century, was appropriated to the daughters of gentlemen under the age of ten. *Mistress* was then the style of grown-up unmarried ladies, though the mother was living; and, for a considerable part of the century, maintained its ground against the infantine term of *Miss.*" — *Todd.*] See **MISTRESS**.  
 With respect to the use of this title, when two or more persons of the same name are spoken of or addressed, there is a good deal of diversity. Some give the plural form to the name; as, "The Miss Smiths;" — others, to the title; as, "The Misses Smith." In conversation, the former prevails; in written or printed composition, usage is divided; and in addressing letters, the latter is the more common. The following authorities are given in favor of the former mode, as used in composition: — "The Miss Cotterels." *James Northcote; James Boswell.* "The Miss Wilkinsons." *Ed. Malone.* "The Miss Penns." *Richard Rush.* "The Miss Porters." *Eclectic Review.* "The two Miss Smiths." *Chambers's Journal.* — The following are in favor of the latter form: — "The Misses More." *Bp. Horne.* "The two Misses Porter." *Sir Eg. Brydges.* "The Misses Porter." *Charles Lamb.* "The Misses Gosset." *Sir Robert Peel.* — Those grammarians, who treat of the subject, generally follow the former mode, (*Miss Smiths*); though some make an exception in addressing letters. — "The Miss Smiths" — much preferable to "The Misses Smith." *Grant's Grammar.*  
 The following remarks are quoted from *Dr. Crombie's Grammar*: "Two or more substantives in concordance, and forming one complex name, or a name and title, have the plural termination annexed to the last only; as, 'The two Miss Louisa Howards;' 'The two Miss Thomsons' Analogy, Dr. Priestley observes, would lead us, as if of another construction, and lead us to say, 'The two Misses Thomson;' 'The two Misses Louisa Howard;' for if the ellipsis were supplied, we should say, 'The two young ladies of the name of Thomson;' and this construction, he adds, he has somewhere met with. The latter form of expression, it is true, occasionally occurs; but general usage, and, I am rather inclined to think, analogy likewise, decide in favor of the former; for, with a few exceptions, and these not parallel to the examples now given, we almost uniformly, in complex names, confine the inflection to the last substantive. — We say, indeed, 'The Missrs. Thomson;' but we seldom or never say, 'The two Messrs. Thomson;' but 'The two Mr. Thomsons.'" Hiley, in his Grammar, says, "In conversation the plural termination is annexed to the last noun only. But in composition and addressing letters to individuals of the same name, we pluralize the title; as, 'To the Misses Howard;' 'To Messrs. Thomson.'" But both in conversation and in composition we pluralize only the name of married ladies; as, 'Mrs. Wilsons were there;' 'To Mrs. Howards.'" — Thus also Dr. Watts: — "May there not be Sir Isaac Newtons in every science? You must not suppose the world is made up of *Lady Aurora Granvilles.*"

**NŌT-WITH-STĀND'ING,\* prep.** Without hindrance or obstruction from; not preventing; in spite of. *☞* In these senses *notwithstanding* has obviously the force of a preposition; yet it is, when thus used, designated by Ash as an adverb, and by the other English lexicographers, it is designated, in all the forms in which it is used, as a conjunction. — Dr. Johnson remarks upon it as follows: "This word, though, in conformity to other writers, called here a conjunction, is properly a participial adjective, as it is compounded of *not* and *withstanding*, and answers exactly to the Latin *non obstante*. It is most properly and analogically used in the ablative case absolute, with a noun; as, 'He is rich notwithstanding his loss.'" — Dr. Webster considers *notwithstanding*, in all cases, as a participle, "constituting, either with or without *this* or *that*, the case absolute or independent." It obviously has the nature of a participle, rather than of a participial adjective. In the above example, "He is rich notwithstanding his loss," *notwithstanding* may be regarded as a preposition governing *loss* in the objective case; or it may be construed as a participle in the case absolute with *loss*.

 “Mr. Sheridan, Dr. Kenrick, Dr. Ash, Mr. Scott, W. Johnston, and Entick, make the first syllable of this word short, as I have done; and Mr. Perry and Buchanan make it long. In defence of the first pronunciation, it may be observed, that this word is not like *primacy* and *primary*; the first of which is a formative of our own; and the second derived from the Latin *primarius*, which, in our pronunciation of the Latin, does not shorten the *i* in the first syllable, as *privativus* does; and therefore these words are no role for the pronunciation of this, which, besides the general tendency of the penultimate accent to shorten every vowel it falls on but *n*, seems to have another claim to the short vowel from its termination; thus *sanative*, *donative*, *primitive*, *derivative*, &c., all plead for the short sound.” *Walker.*

 is denoted by placing the quantities thus, 6 : 3 :: 24 : 12,

nounce the first syllable like rail, it might obscure and

Some very respectable speakers pronounce this word with the first syllable like that in *ra-ven*; and Mr. Nares has adopted this pronunciation. Dr. Ash and Bailey seem to be of the same opinion; but all the other orthoëpists, from whom we can certainly know the quantity of the vowel, as Mr. Sheridan, Mr. Elphinstone, Mr. Scott, Dr. Kenrick, W. Johnston, Mr. Perry, Buchanan, and Entick, make it short. There is a pronunciation of this, and some few other words, which may not improperly be called diminutive. Thus, in familiar conversation, when we wish to express *very little*, we sometimes lengthen the vowel, and pronounce the word as if written *teale*. In the same manner, when *rather* signifies *just preferable*, we lengthen the first vowel, and pronounce it long and slender, as if written *rayther*; and this, perhaps, may be the reason that the long, slender sound of the vowel has so much obtained; for usage seems to be clearly on the side of the other pronunciation, and analogy requires it, as this word is but the old comparative of the word *rath*, soon." *Walker.*

But, notwithstanding so many authorities are against me, I am much deceived if the analogy of pronunciation be not decidedly in favor of that accentuator which I have given. We have but few instances in the language where we receive a word from the Latin, by dropping a syllable, that we do not remove the accent higher than the original. Thus *recondite*, derived from *reconditus*, may with as much propriety remove the accent from the long penultimate, as *carbuncle* from *carbunculus*, *calumny* from *calumniā*, *detriment* from *detrimentum*, *innocency* from *innocentia*, *controversy* from *controversia*, and a thousand others. The word *recondite* must certainly follow the fortunes of the present word, and we find those orthoepists, who have the word, accent it as they do *recondite*, Mr. Sheridan on the last syllable, but Mr. Fenning, inconsistently, on the second." Spenser and Milton place the accent upon the second syllable of this word; and, as Mr. Nares observes, Dr. Johnson has, on the authority of these authors, adopted this accentuation. 'But this,' says Mr. Nares, 'is irregular; for every monosyllabic termination, added to a word accented on the antepenult, throws the accent to the fourth syllable from the end.' With great respect for Mr. Nares's opinion on this subject, I should think a much easier and more general rule might be laid down for all words of this kind, which is, that those words which take the Saxon terminations after them, as *er, less, ness, lessness, ly, &c.*, preserve the accent of the radical word; therefore this and the following words ought to have the same accent as *remedy*, from which they are formed." *Walker.*

R.*) *n.* [*revenu*, Fr.] The income of a state derived from duties, customs, taxation, excise, and other sources; income; annual profits from lands or other funds. — "This word seems as nearly balanced between the accent on the first and second syllable as possible; but as it is of the same form and origin as *avenue* and *retinue*, it ought to follow the same fortune. *Retinue* seems to have been long inclining to accent the first syllable, and *avenue* has decidedly done so, since Dr. Watts observed that it was sometimes accented on the second, and, by this retrocession of accent, as it may be called, we may easily foresee that these three words will uniformly yield to the antepenultimate accent, the favorite accent of our language, conformably to the general rule, which accents simples of three syllables upon the first. Dr. Johnson, Mr. Nares, and Bailey, are for the accent on the second syllable; but Dr. Ash, Dr. Kenrick, Buchanan, W. Johnston, Perry, Barclay, Fenning, and Eotick, accent the first. Mr. Sheridan gives both, but places the antepenultimate accent first." *Walker*. Entick, Rees*; rĕv'ĕ-rĕ or rĕv'ĕ-rĕ', P.] *n.* [rĕverĕ, Fr.] A fit of wandering thought or deep musing; a wild fancy; meditation. — Both the orthography and pronunciation of this word are unsettled, some good writers and speakers using one form, and some the other. — "This word seems to have been some years floating between the accent on the first and last syllable, but to have settled at last on the former. It may still, however, be reckoned among those words, which, if occasion require, admit of either. It may, perhaps, be necessary to observe, that some lexicographers have written this word *reverie*, instead of *revery*, and that, while it is thus written, we may place the accent either on the first or last syllable; but, if we place the accent on the last of *revery*, and pronounce the *y* like *e*, there arises an irregularity which forbids it; for *y*, with the accent on it, is never so pronounced. Dr. Johnson's orthography, therefore, with *y* in the last syllable, and Mr. Sheridan's accent on the first, seem to be the most correct mode of writing and pronouncing this word." *Walker.*

Bailey defines the verb to *ride*, “to go on horseback, in a coach, wagon, &c.,” Johnson, “to travel on horseback; to travel in a vehicle;” Richardson, “to convey or carry on a horse, or other animal, or in any sort of carriage; to sit upon such an animal, or in such a carriage, whether the motion be slow or fast;” and Todd defines the noun *ride* “an excursion in a vehicle or on horseback; as, ‘to take a ride.’” — “He made him to ride in the chariot.” *Gen. xii. 43.*

There is some diversity among our orthoëpists about the *l* in this word and its verb. Mr. Sheridan marks it to be pronounced; Mr. Smith, W. Johnston, and Barclay, make it mute; Mr. Scott and Mr. Perry give it both ways; and Mr. Nares says it is mute in the noun, but sounded in the verb. The mute *l* is certainly countenanced in this word by *calve* and *halve*; but, as they are very irregular, and are the only words where the *l* is silent in this situation, (for *valve*, *álve*, *solvo*, &c., have the *l* pronounced,) and as this word is of Latin original, the *l* ought certainly to be preserved in both words; for, in time, have the same word sound differently to signify different things, is a defect in language that ought, as much as possible, to be avoided." *Walker.*
